Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	78.57% (11 of 14)
1	the teacher did a really good explaining everything, but also letting her students learn for themselves and not micromanaging them.
2	she was very enthusiastic every class.
3	Very helpful and accommodating, cheerful, great job teaching especially for her first time in America.
4	The instructor was enthusiastic and motivating. She was also willing to help and approachable for any course material. The professor's overview of procedures before lab was also helpful for an understanding of the lab's purpose.
5	She made sure to explain everything to us, including what all the equipment did in lab and I found that very helpful because I was actually being able to learn what the equipment did. She also had us do a lot of practice with the equipment which I liked.
6	She made everyone feel welcome and was always in high spirits, which helped the students' spirits from going down. She made a point to know all of our names, even though we see her once a week in a class that's fairly depersonalized.
7	She has taught me everything that I need know about General Biology 101. She is very easy to talk to if you have any questions or concerns about your grade in the class. When it comes to homework, test or quizzes, and projects, she will be willing to give extensions, as long as you email her in a timely manner.

8	She has reiterated what we learned in the lecture significantly well in order to understand the physical part of the course.	
9	Dr. Fu worked extremely hard to make lab enjoyable for all students. She comes in each week with a high level of energy and excitement that radiates onto her students. She is extremely knowledgeable and creates a healthy learning environment for all.	
10	Dr. Fu always made sure students had a clear understanding of the material before beginning the lab procedure.	
11	As we complete our lab assignment, she goes around the room and asks if we understand what we're doing. She's very supportive and I enjoyed her class a lot.	

Q12 - What suggestions do you have for the improvement of this course?		
Faculty: Zhuo Fu		
Response Rate: 78.57% (11 of 14)		
1	try to explain what needs to be done in the lab better.	
2	When you print the tests, make sure that each question and all of its answers aren't split onto two pieces of paper. It made it hard to connect the pieces in my mind when I had to flip back and forth. Sometimes your explanation of things went on for longer than I think was needed. I think it would be beneficial to maybe try to find a simpler way to explain things sometimes. I understand that some students aren't as quick to understand material as others; it's just something to keep in mind.	
3	The course in general needs no improvement.	
4	Nothing. This is one of the best Biology Lab classes that anyone can take. She did an exceptional job the entire semester.	
5	None.	
6	None. Great overall course	
7	I would have liked to hear a more in-depth explanation of the principles on which equipment or procedures worked e.g. why does a positive biuret test turn orange? This would have helped to better keep track of the large amount of processes used in lab, I would also suggest that the teacher pay more attention to cues from class. Often she would ask a question and someone in the class would answer it quietly; others who also had an answer would hear this and assume there was no need to answer. In these cases, however, the instructor did not seem to hear and would assume no one had an answer.	
8	I think the tests need to be fixed a little bit because some questions either didn't have answers or seemed to have multiple right answers.	
9	I didn't like my lab group. They would only seldom let me participate in what we were doing, and that was annoying. Consider the option to switch groups, or even work by yourself.	
10	Communication of expectations could improve a little especially with writing assignments. However it did improve throughout the course of the semester and was not poor at any point	
11	-	

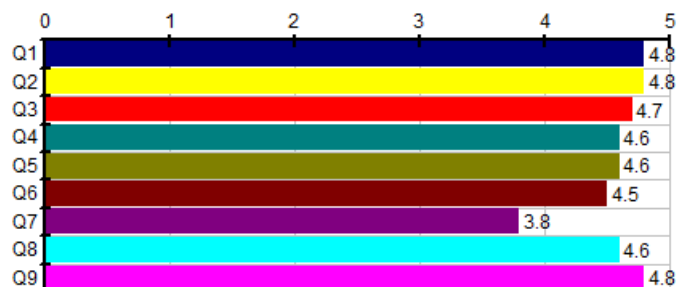

Q13 - What would you tell another student who asked you about this course?		
Faculty: Zhuo Fu		
Response Rate: 78.57% (11 of 14)		
1	nice teacher and not difficult just may need a few things explained.	
2	This course requires your attention, your punctuality, your attendance, and your participation. It's only a burden if you let it be.	
3	That this is a great starting lab for anyone interested in going further in science.	
4	Take this course and try to take it with Dr. Zhuo Fu.	
5	She's a great professor. I don't have anything bad to say about her. It's a lab, so group participation is a must.	
6	It is a great course and I highly recommend it!	
7	If you get Dr. Fu you will have fun in lab	
8	If you can get lab with Prof. Fu you'll enjoy it	
9	I would tell them to read over the lab manual and pay attention to the procedures part of the lecture, as the step-by-step presentation in the lab manual can make it difficult to keep track of the multiple procedures contained in each lab.	

10	I would say the class was great when I took it, especially for the teachers 1st year. So i can only image it has gotten even better.	
11	I suggest that when taking a class with a lab to try and have the same professor for both parts. It is easier expectation wise, also being able to adapt to less teaching styles.

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	83.33% (10 of 12)
1	gone over the material in depth to make sure every student understands
2	Very fun and exciting professor, as well as kind. Always made sure that we knew what student were during in lab and always doubled checked. Was very ready to help and answers questions. Did a good job explaining material before students began working.
3	The instructor was very good at making sure we knew what needed to be done in class and with our assignments
4	She went out of her way to ensure we learned every bit of material she felt it pertinent for us to gain from the class. There was a mild language barrier, here and there there were slight miscommunications, but she put so much energy and time into ensuring we learned the material that everything she wanted us to know, we learned.
5	Great attitude! Always positive and full of energy made the classroom environment fun.
6	Engaged students.
7	Dr. Fu's interaction with us students was amazing. She is by far my favorite lab professor I've had so far. I would recommend and take her class again. She does great making students participate in group discussions and very helpful if we don't understand something.

8	Dr. Fu was above and beyond ready each class. I honestly learned a lot more from her review powerpoints than I learned in my actual biology lecture. She is so informative and helps explain it in a way that really clicks. The diagrams drawn on the board would help a lot as well.	
9	Side note--English is not my first language either (even though I no longer have an accent) and I just wanted to say your english is so good for someone who hasn't been speaking long! Good job!! You were always so prepared with your note cards and explained each point that we needed in every projects. So helpful and precise in helping us students! Thank you so much :)	
10	Dr. Fu was always very positive and upbeat. Sometimes her ways of explaining things were very entertaining and educational. She said that this was her first time teaching this class and I think she did an excellent job.	
10	April described our labs well and taught the material that corresponded to the lab. She also followed along with the Lecture material well!	

Q12 - What suggestions do you have for the improvement of this course?		
Faculty: Zhuo Fu		
Response Rate: 75.00% (9 of 12)		
1	none	
2	Use lab handouts for other activities.	
3	Some of the labs themselves weren't that exciting or informative. Perhaps the biology department can come up with some more labs that are more challenging? For example, the colored "worms" (the pieces of strings) out in the grass....that lab felt unnecessary because it's common sense that the brightly colored ones would be less camouflaged and eaten first. I think that something else should be substituted for that lab. I'm not critiquing the teacher for this, I think this should be changed in the biology department or whoever comes up with the lab plans for the semester.	
4	Nothing to add.	
5	None	
6	None	
7	Just keep being supportive of your students, she is doing a great job.	
8	Do it the same this class was great. I didn't like the bean beetle lab report but that is probably a requirement.	
9	As far as the course itself, I would prefer to do less labs that involved killing things, such as brine shrimp or bean beetles. And I would also prefer that the lab section where we worked with animal feces be taken out completely. I feel like the negatives of handling feces far outweighed the positives of what we learned from that lab section.  My only suggestion to the professors concerns keeping lab procedures consistent among the students. What I mean by this is that sometimes during a lab the instructions were somewhat unclear and different groups were doing the same thing in different ways. For example, on one of the labs we had to measure certain parts of different animal skulls in a specific way. Many students were doing this incorrectly and when we had to exchange these numbers with other groups, there was a lot of confusion and inconsistency. I would suggest that if something like this happens and one group asks for clarification from the professor, it would be beneficial for the professor to grab the attention of the entire class and make sure that no one else is have the same misunderstanding.	

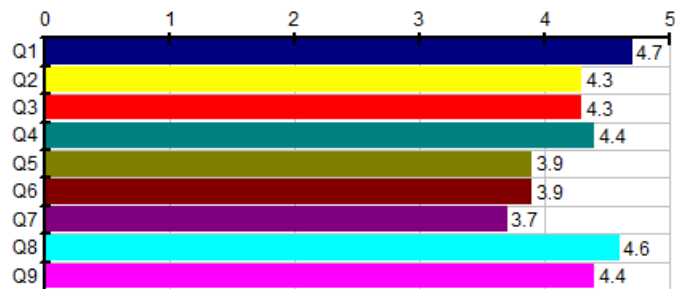

Q13 - What would you tell another student who asked you about this course?		
Faculty: Zhuo Fu		
Response Rate: 83.33% (10 of 12)		
1	take her class!	
2	definitely try and take this course with Dr.zhuo! she is a delight to be around and very nice to all her students, she makes lab enjoyable and is very flexible with due dates	
3	Take this professor if given the option.	
4	Take it!!!!!! Dr. Fu is amazing!!!!	
5	Take it with Dr. Fu because she makes it fun and teaches you a lot!	
6	Professor Fu is engaging and cares deeply for biology. She will do everything she can to ensure you are successful in her course.	
7	I would say that it is a great course. I would also warn them that some of the labs require killing tiny animals and involve feces. Just so they know what they're getting in to.	
8	I learned and had fun in this class. I would recommend it to them.	
9	Good teach, makes the lab fun and produces a good environment making it easy to learn. Good professor to learn from.

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	89.47% (17 of 19)
1	Well taught lessons, and ample time to turn in assignments.
2	Very enthusiastic.
3	The professor had a positive attitude and genuinely wanted students to be able to succeed.
4	The different exercises and experiments we conducted actually helped me to learn the material that I am expected to know.
5	She was relly helpful in showing how to do things in the lab when we werent sure what to do.
6	She is very enthusiastic about biology and that makes the lab more interesting.
7	She is very good at explaining and breaking down the topics and giving us the information we need to know.

8	She grades things really quickly and responds to emails pretty quickly. She made it so we were able to learn but it was not a super stressful experience and she spaced out the assignments so we wouldn't have to do everything at once.	
9	She gives us different pearnig methods of the lab before the lab starts.(PowerPoints, lab manuals and other things)	
10	Reviewing material previously learned in lecture helped to reestablish concepts and prepared students for the lab. The tests also covered all of the material necessary to learn during the course and Professor Fu returned the graded test in a very timely manner.	
11	My instructor did a very good job at providing material, that was very relevant to what we needed to learn. She always kept the classroom positive and good learning environment. I did really like the mini-concept quizzes after most of the labs and I like how the lab report was assigned in small sections over the course of the semester.	
12	Labs explained clearly and thoroughly.	
13	In concisely explainin topics without making it difficult to understand.	
14	I loved the powerpoints at the beginning of lab because that was really helpful and it explained what we were supposed to learn from the lab that day.	
15	Having a review at the beginning of class to go over what we leasrned the previous class was helpful. I liked how you didn't lecture a long time before we did our lab because that gave us more time to actually do the lab since we usually already covered the material in our lecture.	
16	Grading things within two or three days Giving more help in class during lab if you didn't understand what was going on Walked by group to group to make sure we were doing the lab right Offered help outside of class if we didn't know something Summarizing new labs to the important information we needed to do	
17	Good attitude!	

#### Q12 - What suggestions do you have for the improvement of this course?

Faculty: Zhuo Fu

Response Rate: 78.95% (15 of 19)

1	na	
2	Talk slower and enunciate your words more because I could not understand you at times and I know English in the most difficult language to learn but I would suggest just slowing down a bit.	
3	She should slow down on talking because understanding her is a little difficult due to the accent and she speaks really fast. Lower the time on explaining the lab and give people more time to work on the lab.	
4	Providing more supplemental materials for understanding the topics covered in lab.	
5	None	
6	None	
7	More notes	
8	Maybe explain a little better the times for when the quizzes are due because to me it was a little unclear because I thought everything was due by midnight after the lab but some stuff was due before the lab so it caused me to miss a few quizzes.	
9	Many times during the labs I was unsure why I was completing a certain task. The lab purpose was not well explained. Also the procedures outlined in the lab instructions were often shortened or skipped. Many times I felt confused about what concept the lab was attempting to explain.	
10	Less time spent on powerpoint more time spent on actual lab procedure.	
11	I would suggest that there not be so much of a lecture at the beginning of the lab. I liked the review and it helped prepare me for the lab exams but if we had already learned about the topic in lecture I don't think we need to spend an hour addressing it. I think time management would be good for this course and allow students to jump right into the lab after the review.	
12	I would suggest less overlap of material between lecture and lab. Some days it felt like i was sitting in lecture all over again and it felt like a waste of time.	
13	I thought my instructor talked a little too much at the beginning of the labs. A good majority of the pre-lab lecture was already well known knowledge for us, and took up time that we could have been completing the lab more diligently with greater attention to detail. Sometimes she would also talk very fast, and information would be lost between her accent and the speed at which she talked.	
14	I don't really have any suggestions that I can think of.	

15	Allow for class time for the lab report for any questions.	
----	--	--

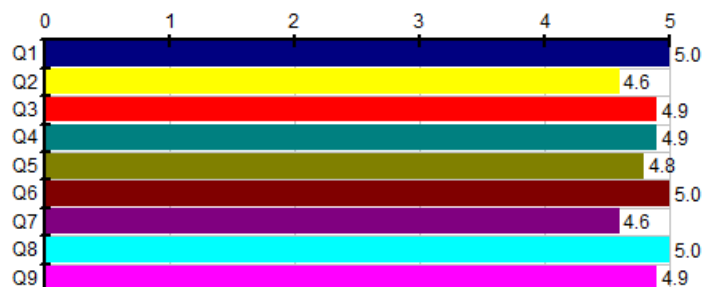

**Q13 - What would you tell another student who asked you about this course?**

<b>Faculty:</b> Zhuo Fu		
<b>Response Rate:</b> 78.95% (15 of 19)		
1	na	
2	Very engaging and easy to understand, helps very much so when taking bio class and helps affirm the material.	
3	This is a well paced class to take, the material is interesting and not too difficult.	
4	The lab was actually really interesting. I learned better in this class than I did in the lecture because we do hands on things in this class which really helped me to understand the material better.	
5	The course is fun and chill but it is hard if you don't do assignments.	
6	Professor Fu is a really good lab instructor and helpful when learning new info!	
7	Powerpoint explanation followed by a lab assignment. Standard lab class.	
8	Listen closely and do the online quizzes always because that is most of your grade in there	
9	Just make sure you do the assignments and quizzes and you'll be good. Its a fun class. the labs are all pretty interesting.	
10	I would tell them to read the lab handouts ahead of lab and make sure they were very familiar with what was expected of them on lab day.	
11	I would recommend this course but warn them that this lab takes longer than other labs and at times it can be frustrating.	
12	I think it is a great and invaluable course to take. A great growing and learning experience for first year college students. Ms. Fu did a great job with teaching the class!!!!	
13	I tell the other student to be prepared to invest some time in learning biology. Investment in the course makes the material much easier to learn and absorb.	
14	Have fun	
15	Despite the difficult subjects discussed in lab, I would encourage the student to take the class because overall is was not difficult given the proper instruction.

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	90.91% (10 of 11)
1	reviewing previous class material to make sure we understood and remembered
2	Very good at making sure everyone is on track with what they are doing in the lab. Very helpful
3	Very fun and energetic, I was always excited to come to lab and learn.
4	Very detailed instructions were given before each lab along with a mini review each class. She supported the student in understanding content and helped during lab and after lab. She was a very fair grader as far as assignments were concerned. Very accommodating.
5	The instructor went over each lab before hand and gave the student room to explore the lab.
6	She was very organized and laid things out very clearly. You knew what to expect every week.
7	She explained the materials that we needed to know very well.

8	Professor Fu has been a GREAT professor to have for lab. She explains things very well and goes far and beyond what is expected of her to help us as students. Although my lab class was pretty small, she was very attentive to every single student when they needed help or attention. She does a great job at balancing the difficulty of the lab and the difficulty of the lecture. This balance allowed me to connect the dots between my lab and lecture without ever feeling overwhelmed with assignments for the lab. Without her lab, I would be missing some important pieces to the material learned if I only had my lecture professor.	
9	Graded assignments quickly and was very helpful in labs.	
10	Explained things well.	

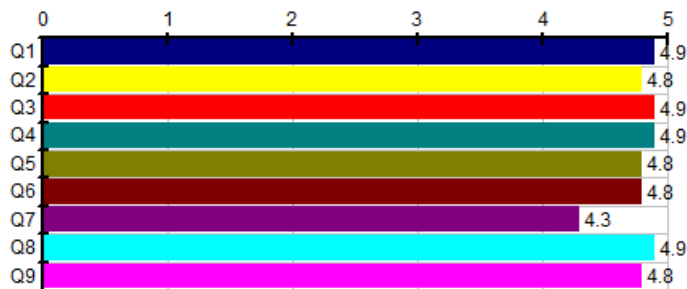

Q12 - What suggestions do you have for the improvement of this course?		
Faculty: Zhuo Fu		
Response Rate: 54.55% (6 of 11)		
1	on homework assignments to have clear instructions so that a person is not confused. on the final lab report make each detail clear so that points are not deducted if they don't have to be.	
2	Perhaps making the quizzes a little more difficult would improve the course	
3	None that I can think of.	
4	None in particular, had a wonderful experience in this class.	
5	Maybe let the student work early because sometimes we don't hear all the instructions it is in the lab hand out. This way the student is independent and they can finish the work in their own past.	
6	I do not have any suggestions for improvement of the course and how it's taught. The only thing I can think of is on a rubric for the lab report it said we needed three sources, while another document said we needed two. But that's the only thing I can think of, haha.	

Q13 - What would you tell another student who asked you about this course?		
Faculty: Zhuo Fu		
Response Rate: 81.82% (9 of 11)		
1	i would tell them to come prepared each lab with your lab report and if you can avoid it try not to miss lab because it is hard to find out what you missed.	
2	Try to get in this lab.	
3	To take bio 102 lab with her she is engaging and supportive.	
4	She teaches very well and I will recommend her to other students.	
5	It's a good class, Dr Fu makes the learning environment for relaxed	
6	I would HIGHLY recommend this class to another student.	
7	Fun, hands on class!	
8	Definitely take this class.	
9	Definitely take any lab course with Dr. Fu, she makes even the most tedious of lab activities fun and interesting and is a joy to learn from.

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	88.89% (8 of 9)
1	Some of the things that my instructor has done especially well are coming to class prepared and ready to teach. 
2	She kept the classes fun and interesting, always had a very cool lab assignment every class that kept me excited to come back the next week. She also made sure everyone knew when assignments were due, how much that assignment would have an impact on their overall grade, and always had a smile on her face. 
3	Provided hands-on assistance when required 
4	My instructor was very helpful with clearly detailing what the requirements were for each part of the lab report and the final lab report. My instructor also was very helpful in teaching me how to use excel. 
5	Kept class interesting. Kept assignments clear and submission requirements clear. 
6	Giving talks before class were informative and gave the information we absolutely needed to know as well as outlining what was expected of us for each test/assignment. 
7	Dr. Fu clearly has a passion for not only the material, but also for creating a supportive environment for dispersing the material. She will go out of her way to make sure that everyone is on the same page and has ample opportunity to address any questions. 

8	Answer questions when help is needed and respond to email outside of class, which is very important	
---	---	--

**Q12 - What suggestions do you have for the improvement of this course?**

<b>Faculty:</b>	Zhuo Fu	
<b>Response Rate:</b>	77.78% (7 of 9)	
1	Nothing I enjoyed it	
2	None	
3	None.	
4	No suggestions.	
5	I found her style and method of teaching and conducting labs effective the way it is.	
6	Genuinely can't think of one. I feel you should become the instructor for the lecture sectioned as well. I didn't learn anything from my lecture instructor.	
7	A suggestion that I have to improve this course is to better orchestrate the lecture and lab significantly long hours and study material.	

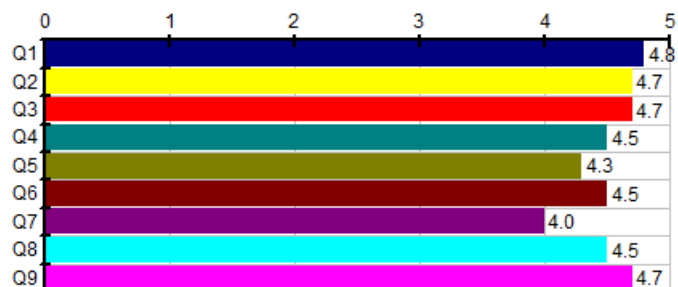

**Q13 - What would you tell another student who asked you about this course?**

<b>Faculty:</b>	Zhuo Fu	
<b>Response Rate:</b>	77.78% (7 of 9)	
1	To try and get into April's section because she is clear and concise.	
2	That it was really fun and that they wouldn't regret taking it with this instructor.	
3	Take the course with her, if you do the homework and read you will be fine. She is fair and very helpful when you need help	
4	I would tell them that it is not easy and it takes knowledge, patience, and maturity to study biology.	
5	Good.	
6	Definitely sign up for Zhuo Fu. She ensures you understand the material before going to the next step. I learned the majority of the information I needed for the entirety of BIO102 from the lab, not the lecture.	
7	Come prepared with enthusiasm and Dr. Fu will give it right back! Awesome professor, excellently conducted course.

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	83.33% (5 of 6)
1	The instructor has given us the information to best help us in our first semesters of college. She has broken down the walls of anxiety and depression in the school environment, and taught us tricks to overcome these obstacles.
2	The instructor was very organized and graded assignments very efficiently. The instructor also brought in other people to lecture about pertinent things .
3	She explained in person what was going to happen in the next class. She didn't depend on coarse announcements . Showed relevant and informative videos Gave printed version of syllabus first day of class
4	Great ideas and projects to do in class.
5	Gave me useful resources

Q12 - What suggestions do you have for the improvement of this course?	
<b>Faculty:</b>	Zhuo Fu

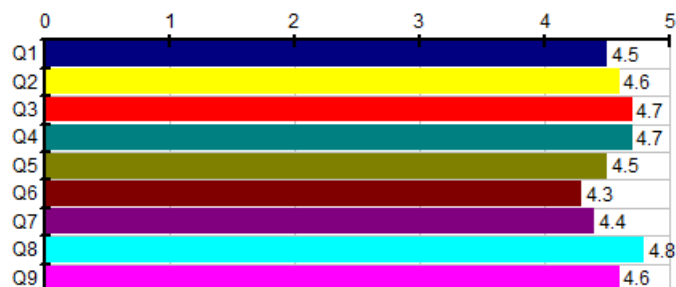

<b>Response Rate:</b>	<b>50.00%</b> (3 of 6)	
1	This course can have some more hands-on activities so that the class could feel more exciting.	
2	I would suggest that the instructor could have been a bit more clear about assignments (like providing descriptions for blackboard submissions, etc). I also think that some of the lecture time could have been used more efficiently in some cases.	
3	-	

<b>Q13 - What would you tell another student who asked you about this course?</b>		
<b>Faculty:</b>	Zhuo Fu	
<b>Response Rate:</b>	<b>83.33%</b> (5 of 6)	
1	This course was useful in learning about study tips and future careers and is overall a good class.	
2	This class is an easy A, and there is no reason why anyone should fail an SDV course. The assignments are not difficult, you just must make the time to do them.	
3	That you will learn good study habits	
4	Its a great course	
5	I would encourage to another student to take that class.

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	70.00% (7 of 10)
1	listening and responding to student concerns
2	The instructor stayed organized throughout the course and was eager to hear any feedback. He was adaptable and facilitated workload to where it wasn't overwhelming.
3	Switching the format as to how we submit the assignments was a great idea! It's much easier to get one word document instead of 5+.
4	Positive communication and friendly tips and advice present for graded assignments.
5	I think Fu did a great job of creating an environment where his students would be able to learn interesting and valuable information about nutrition. I definitely walked away from this class with a better idea of how to maintain a better diet.
6	I liked her ability to incorporate - everyday life with the material. She also had a variety of ways to learn- textbook, you tube, research on-line, and personal examples to make us drawn conclusions.
7	At first I was a bit anxious because I prefer in-class learning. I was very surprised to find out her class is very enjoyable. Now I start thinking to study nutrition more when I am required to have Bachelor degree after I become RN. I wish I could keep studying in her class. I will miss her class so much. Her learning approach is very organized but not overwhelming.

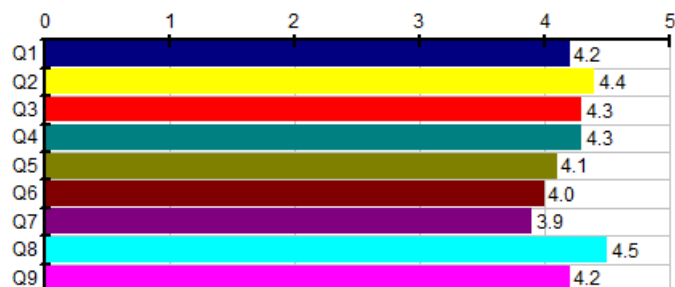

Q12 - What suggestions do you have for the improvement of this course?		
Faculty:	Zhuo Fu	
Response Rate:	50.00% (5 of 10)	
1	Possibly - just meet up one time with the instructor on campus.	
2	Open all modules at beginning of semester to allow students to work at own pace, but include assignment deadlines as necessary.	
3	None :)	
4	N/A because it was excellent.	
5	Keep on refining your method, I very much enjoy your style!	

Q13 - What would you tell another student who asked you about this course?		
Faculty:	Zhuo Fu	
Response Rate:	60.00% (6 of 10)	
1	Take it - you will learn alot!	
2	It's busy work, but you learn important things about your own body, and it isn't excruciating.	
3	It was the only class I've taken that didnt require me asking the teacher what they wanted/ meant from an assignment. Useful information and an undemanding professor.	
4	I strongly recommend another student to take her class.	
5	Even if you don't think you'll need any of the information from this class for your career, you should definitely take it in order to have a better idea of how to maintain a good diet!	
6	Easy to understand information presented and yet very informative

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	75.00% (21 of 28)
1	The instructor was very responsive to feedback and was great at providing a positive learning experience.
2	The instructor organized this course very well and uploaded the assignments ahead of time so students could have enough time to do them.
3	The assignments were always on time and emails were responded to very promptly.
4	The amount of homework and assignments were good.
5	Telling us exactly what we need to read in the text book.
6	She is very responsive and helpful
7	Professor Fu did a great job of giving us the main points of each chapter in a weeks time. Instead of having to go over a lot of information and a lot of reading she made it so we only needed key takeaways.

8	Posting a couple of weeks ahead of time for assignments	
9	Making sure the weekly assignments and projects are clearly explained.	
10	Made the assignments very relevant to what we're learning and allowed us to take tests multiple times to really learn the material.	
11	Made online learning feel personal and interactive by writing conversational, engaging discussion questions with examples from their own life. Been flexible in adjusting assignment requirements when it was difficult to acquire the resources necessary for assignment completion. Been accessible and encouraging.	
12	I think for it being his first time teaching the course he did really well. I think he was prepared with the method he wanted us to learn.	
13	I love having the opportunity to learn and find the answers and not feel overwhelmed by all of the information. I loved this class and hope the students following me will to.	
14	I had Dr. Fu for Bio 101 Lab last semester and absolutely loved her! She is so sweet, positive, and uplifting and was so excited when I saw that she was teaching mu nutrition class! I thought she did a great job this semester and helped outline everything that was most important for us to know and be aware of for our future medical careers, while also pointing out lifelong tips.	
15	He selected important sections of each chapter to complete his homework, so as students we did not need to waste time to skim the textbook only to answer questions. He assigned proper amounts of reading to complete his homework.	
16	He gives us the specific page numbers where we can find homework questions. He answers your questions pretty quickly.	
17	He does an excellent good at explaining his expectations and requirements to do well.	
18	Give us the opportunity for bonus points for helping her with feedback about assignments.	
19	Communicated with us about assignments and due dates without meeting.	
20	Clear instructions	
21	Class is well structured and consistent. Grades are posted in a timely manner.	

<b>Q12 - What suggestions do you have for the improvement of this course?</b>		
<b>Faculty:</b> Zhuo Fu		
<b>Response Rate:</b> 75.00% (21 of 28)		
1	to keep the formatting of assignments as it is currently, have one word document with all the material for the week on it to later be uploaded once it is complete	
2	none at this time	
3	it is a great course	
4	There were no lectures, I had to teach myself the material. It would have been helpful if besides the reading of the text book we had actual lectures. That way the material would have sink in and I would remember what I actual learned.	
5	The course was way too easy. There was unlimited time and unlimited attempts on exams therefore impossible not to get an A in the class. I would recommend making this class way harder, the weekly worksheets were easy and I was able to finish them in a few hours. I would recommend maybe adding case studies or a project to the assignments.	
6	So far the expectations have been very clear and the assignments are easy to follow. I do feel that there could be more engagement in order to retain the information rather than simply answering questions.	
7	Nothing	
8	None	
9	None	
10	None	
11	None	
12	None	
13	None really.	

14	N/A	
15	N/A	
16	Keep up the awesome job	
17	I would suggest making all assignments available at once. There have been many times where I wanted to work ahead and complete extra assignments, but was unable to because only one assignment was made available per week.	
18	I wish assignments were due at midnight instead of 5PM	
19	I like to have closed-note quizzes so that I test my memory and understanding better; maybe a weekly quiz on material from the week before would help us review information a little later and therefore remember it far better.	
20	I like the way the online class was set up and the way everything is.	
21	I do not have any suggestions.	

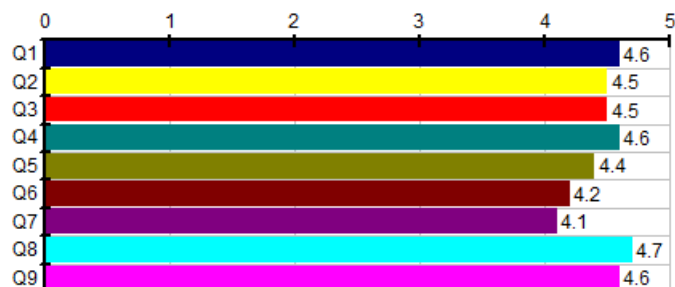

Q13 - What would you tell another student who asked you about this course?		
Faculty: Zhuo Fu		
Response Rate:	71.43% (20 of 28)	
1	You'll get out of it what you put into it, so you should really read the textbook even though it's not mandatory.	
2	Yes, take the class. I have learned a lot and had a good time enjoying it this semester.	
3	Way too easy, a lot of the information I had already learned in my biology classes but it's interesting enough. I would definitely recommend if you want an extremely easy A with minimal work.	
4	To take this course with this professor	
5	This is a very informative class and it will help you look at the things you eat a little closer. This is a online class and this was my very first online class and it has gone over quite well.	
6	This course is very interesting and will definitely teach you things about your health and nutrition in general that is very useful to know. It is easy to pass if you do all the work and turn it in on time.	
7	This course isn't too difficult at all and is manageable.	
8	That it is a wonderful class and it teaches you a lot about your body and health.	
9	Take it! It provides a good base for nutrition and is a pretty straight forward course.	
10	Recommend!!	
11	Professor Fu is very precise and helps you learn all the material you need to know instead of having you read everything. He's willing to help you understand a concept if you don't understand.	
12	Keep up with the weekly schedule and you will do just fine.	
13	It's an interesting topic to learn and use it on your daily life. But I wish the course was more engaging and actual taught you.	
14	It's a great course.	
15	I would tell them to do their assignments on time and they will get an A.	
16	I would recommend this class for anyone going into the health field. It's very self-explanatory and easy if you put in the effort to do the work.	
17	I would refer other students to take his course.	
18	Given that it is an online course, it is recommendable to someone who wants to learn about nutrition but does not have enough time to fit in his or her schedule.	
19	Definitely take it, it is a great online course.

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	70.59% (12 of 17)
1	The study guides were well developed.
2	The instructor did well making the class fun and interesting even though it was online.
3	The class was entertaining
4	She was understanding and always available when needed. Although I never met her in person, she seems like a sweet woman. I am glad I have her as a professor this semester.
5	She was easily accessible via email and responded promptly.
6	She is good at alleviating any worries we may have about the material in the class. She explains what is expected clearly, and reminds us it is for our benefit. She is very personable, I would not be afraid to approach her for any questions I may have. She also is good at guiding us through reading the chapters of the textbook.
7	Relating with students.

8	Professor Fu's online class was very organized and easy to navigate.	
9	My instructor is super friendly, prepared, and intelligent. She was very good at keeping up with grades, and getting back to me if I had any question or trouble with blackboard. I wish I could have her to teach more classes!	
10	I learned a lot from this class and felt the quality of instruction was really good for an online class.	
11	Doc. Zhuo Fu has the best interests of her students in mind. She compiles assignments that target the important aspects of the class, and encourages her students to look deeper than the surface into any given topic.	
12	Be on time	

#### Q12 - What suggestions do you have for the improvement of this course?

Faculty: Zhuo Fu		
Response Rate: 64.71% (11 of 17)		
1	To be more detailed	
2	None. This course and her assignments have been great and really helped me grow. I know so much about nutrient and my body than I ever have before.	
3	No improvements!	
4	Maybe have a variety of assignments	
5	Less videos would be good, some of them made me feel like they weren't really needed as the teacher did a great job explaining and teaching as is.	
6	It would have been nice to be able to work ahead in the class.	
7	I would make sure that politically charged statements aren't included. Although I agreed with the majority I can see it creating a divide between student and teacher when that is not the case.	
8	I think using the discussion board more would be a good way to get students to interact about the topics.	
9	I don't have any.	
10	For being a online class the structure of the program was well done.	
11	Course material and assignments were a bit broad so I feel as a result it was difficult to really absorb and retain the info since so much was being covered in a very short time.	

#### Q13 - What would you tell another student who asked you about this course?

Faculty: Zhuo Fu		
Response Rate: 70.59% (12 of 17)		
1	Yes	
2	Welp, I don't really talk to students about the "qualities" of a class. I'll tell them whether or not it was boring, and whether or not I liked the professor. In this case, the class was as interesting as diet therapy could be, and Doc. Zhuo was awesome, with a wicked sense of humor!	
3	The course was straightforward but quite broad in the amount of material that was covered.	
4	That it was interesting but somewhat easy.	
5	Take the class!	
6	It's good. Not too difficult and very interesting.	
7	It is super informative and the teacher so super sweet.	
8	It is a good course to take.	
9	If you are looking to take an online class this is a great one to take. The material was clearly laid out and I felt like I learned a lot.	

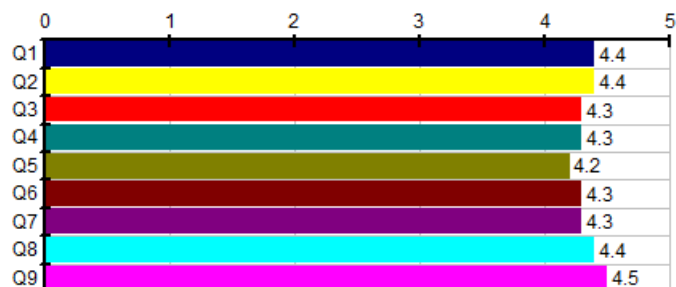

10	I would say, take it. It is a great class and you can learn great things which will help you in life. It isn't a bad course, its worth it. Especially this teacher. Sweetest woman ever.	
11	I would say the material is very interesting and useful for everyday life, and the professor is very helpful, sweet, and funny.	
12	I would highly recommend! It's duper interesting!

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	58.33% (7 of 12)
1	getting the assignments loaded on time and grading in a timely fashion
2	Very clear instructions and class format! No confusion
3	Some things that the instructor has done especially well for this course is being available almost all the time when I had a question and being very efficient in the grading process.
4	She was very helpful explaining things I did not understand, she kept on top of grades, and gave us many opportunities to express our opinions and share our experiences.
5	Making individual assignments easy and quick, as long as one has done the reading.
6	He was very patient, considerate, explained things very well
7	Grading and the way we did tests was done well

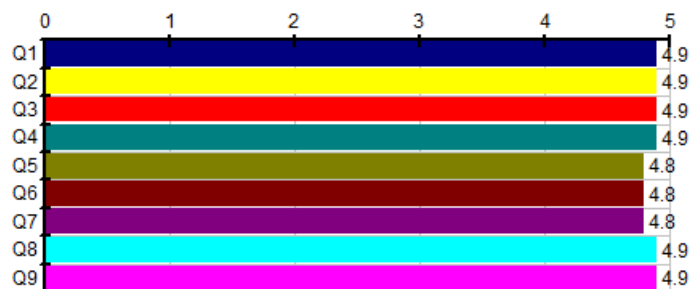

Q12 - What suggestions do you have for the improvement of this course?		
Faculty: Zhuo Fu		
Response Rate: 58.33% (7 of 12)		
1	nothing really, the class was informative and fun.	
2	none	
3	check spelling before its uploaded, sometimes I didn't understand questions because they were worded incorrectly	
4	No	
5	More guided questions for sections of the textbook for a better understanding of material	
6	Language barrier was an issue. Class was also far too easy and took almost no effort.	
7	As of now I don't have any improvements for the course, I think everything was done extremely well.	

Q13 - What would you tell another student who asked you about this course?		
Faculty: Zhuo Fu		
Response Rate: 66.67% (8 of 12)		
1	yes	
2	The easiest class you will ever take.	
3	Take it, it's totally worth it to get to know more about the subject and the teacher is super sweet.	
4	It's a great class, very informative	
5	It was a very good course and the instructor is very kind and good at teaching the material .	
6	I would tell another student who asked about this course that if they wanted a health care course where you would learn about children's safety, health, and emotions (and maybe even apply to your own life) this is a great class to take.	
7	Great teacher, Easy to grasp concepts, worthwhile knowledge.	
8	Fun class, educational, learned a lot, low stress.

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	88.89% (16 of 18)
1	explained things well
2	She was great and really made the information easier to learn.
3	She was friendly, helpful, and available to answer questions. Even if the course was online, she was on top of replying to emails or explaining questions that I was confused about. She graded assignments quickly.
4	She was a really well responder. Since my class was online, she was really quick in responding back to my questions.
5	Sending reminder emails when assignments were due was very helpful!
6	Providing Essential information over the course of 12 weeks. Giving a complete and full understand of all units and topics
7	No need to improve something that's already perfect.

8	I had never taken an online course before, but she made the transition into online learning easy and accessible. She provided us with lots of time to complete assignments, which allowed me to work at my own pace. Each week, she would go over terms and concepts that students were unclear about and gave us a chance to understand these topics. The class was well-run and informative.	
9	Graded quickly	
10	Gave very clear instruction on what they were looking for in the answers to assignment questions. Clear expectations.	
11	For every assignment she will have a review portion that will go over things that a lot of people were getting wrong or not understanding. This ensured us that we knew the correct information for everything that we learned.	
12	Dr. Fu is a lovely instructor! Even though I only took her online, I feel like I know her well. She's really funny, and teaches her class with an energy that makes learning easy. She also grades things and responds to emails pretty quickly.	
13	Dr. Fu does a wonderful job of giving enjoyable weekly assignments that are thought provoking and encourage personal reflection of one's nutritional habits. The concepts in each lesson are tied together well, and I like how Dr. Fu uses various internet sources to supplement the textbook. Also, I appreciate being gently reminded that assignments are due. Oh, and a great sense of humor!	
14	As an online class, our professor was very consistent with reminding us when assignments were due when she didn't have to and I personally appreciate that.	
15	Although this was an online course, the instructor communicated with a sense of humor. This is always a good teaching/learning attribute. The instructor also was able to focus on areas she thought to be important.	
16	1. He has explained our work very well 2. He encourages us too do the bonus 3. He is very good about reminding us to turn stuff in	

<b>Q12 - What suggestions do you have for the improvement of this course?</b>		
<b>Faculty:</b> Zhuo Fu		
<b>Response Rate:</b> 83.33% (15 of 18)		
1	nothing	
2	none	
3	no improvements	
4	nada	
5	This is the first nutrition course I've taken. I found the text sometimes didn't explain concepts well. Also, I've taken a great number of college courses. This course required as much time and effort as any 3 credit course. It should be re-evaluated.	
6	Nothing	
7	Nothing. PAY HIM MORE.	
8	None.	
9	None, I learned a lot about health that is very useful for everyone to know for personal reasons.	
10	No suggestions	
11	N/A	
12	If we could possibly have one session in person would be very helpful because we can get answer very quickly and if we have a follow-up question, we can ask it as well.	
13	I thought the class was very well.	
14	I think that this course was run perfectly. I have no suggestions.	
15	I can't think of any suggestions. I think she runs her class very well.	

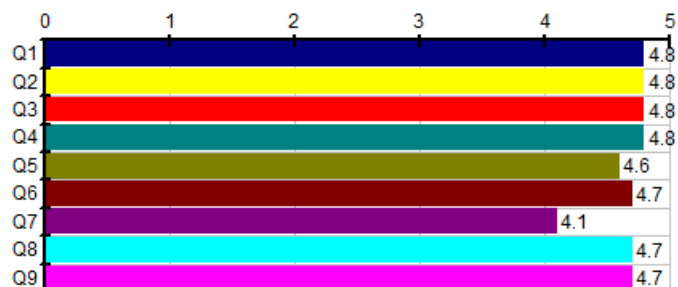

<b>Q13 - What would you tell another student who asked you about this course?</b>		
<b>Faculty:</b> Zhuo Fu		
<b>Response Rate:</b> 94.44% (17 of 18)		

1	learning cool things	
2	learned a lot	
3	This course is laid out nicely and easy to follow. Everything is tied together well and makes sense.	
4	The teacher is awesome and the class is super easy. Definitely recommend taking it	
5	That it was my favorite class I took this semester and I highly recommend taking this class whether they're interested in nutrition or if they need the extra credit hour.	
6	Take this class; the teacher is very nice and makes it very easy to learn!	
7	Take her! She's really fun, and you'll learn a lot. As long as you do the homework and pay attention to announcements, you'll do great.	
8	TAKE IT!	
9	Please realize that although this might sound like an easy course, it's going to involve effort. You will really have to dig into the assignments to find the answers, and you will learn something. I'm not a nutrition newbie and even I learned from every assignment. Try to work on your assignment during the week. Take an hour here and there so you aren't rushing at the last minute. It will be more enjoyable that way and you won't have to do it on a Saturday night! Thanks for letting me share my thoughts. Sincerely, Heather Karstetter	
10	It was fun and easy if you do the work	
11	It is fun!! The things you learn....are crazy and definitely change your perspective.	
12	It is a good way to learn established knowledge regarding nutrition.	
13	I would tell them to take this class if they would like to know about health.	
14	I would tell another student that it is an easy yet informative course that is perfect for fulfilling a health credit. The coursework requires the student's attention, but all of the answers can be found in the resources provided.	
15	I would definitely recommend this course with this professor.	
16	Definitely recommend professor fu she was very informative and told us her personal experiences to help us understand and learn material.	
17	Definitely recommend taking this course because of all the information you will learn that can help not only you but others around you from the knowledge you learned throughout the semester.

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	66.67% (18 of 27)
1	honestly, my instructor did everything well starting from giving easy and smoothly assignments until grading on time.
2	gave good instruction
3	The wealth of knowledge that my instructor is very impressive and made the course very fun.
4	The instructor always responded to my questions in a short amount of time, gave plenty of time to finish assignments and kept use updated with announcements.
5	The Assignments The Dietary Analysis Project
6	Streamlined course material to highlight relevant sections
7	She was great about grades and awesome about getting back to you whenever you had a question.

8	She provide info about nutrition that will help you maintain a healthy lifestyle. Her online course is well put together.	
9	She made the class fun and was very informative even though the course was online. I learned many things that I did not know before.	
10	She is fun and made this class very enjoyable	
11	She always grades efficiently and explains material well.	
12	Sends reminders on assignments and grades quickly	
13	My instructor was excellent with making nutrition fun and understandable for anyone to pick up.	
14	I like how the tests are online.	
15	I learned a lot in this class and really enjoyed it!	
16	I have enjoyed how this class is not too labor intensive, but it is still easy to understand the material.	
17	Great communication	
18	Grading our assignments on time.	

#### Q12 - What suggestions do you have for the improvement of this course?

Faculty: Zhuo Fu

Response Rate: 59.26% (16 of 27)

1	nothing	
2	none	
3	none	
4	There was a big misunderstanding about what type of textbook we needed for this class. Most of the students bought the wrong textbook. So the assignments were challenging to complete.	
5	Nothing	
6	None	
7	None	
8	None	
9	N/A	
10	More tests	
11	Just post the right book that is needed. I think there was a mixup about the specific edition that was needed for the course and I got my book off of amazon and was unable to return it and it made finding information very hard.	
12	I understand English is not her first language, but she should proofread or have someone proofread her assignments.	
13	I think the amount of projects and stuff could be limited.	
14	I have no complaints about this course.	
15	I enjoy panopto leactures as part of my learning. I wish there was more audible teaching.	
16	I don't have any improvements for the course.	

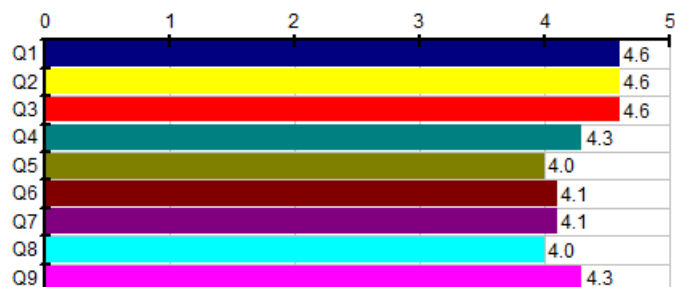

Q13 - What would you tell another student who asked you about this course?		
Faculty: Zhuo Fu		
Response Rate: 62.96% (17 of 27)		
1	the class is very informative	
2	good course to take, not too hard and pretty interesting.	
3	Zhou Fu is my favorite teacher at PVCC so far!!! Take her class she is amazing.	
4	You will enjoy this class and you will learn so much	
5	This is very informative and a fun class to take! This class has weekly assignments and students need to keep up with the assignments but I really enjoyed learning about nutrition.	
6	This is a very easy and interesting class.	
7	This course is a great course.	
8	The Professor is great. He works with you and the material sticks.	
9	Take this course it is a really easy and fun course.	
10	Super fun class, definitely recommend especially online	
11	I would tell the student to take the course because it's interesting and it's not hard at all.	
12	I would tell another student that this course provides you with knowledge about health care and give you projects to maintain and improve your own health.	
13	I would say that the environment is fun and to be ready to learn about treating your body better.	
14	I highly recommend taking HLT 230 course with Dr. Zu because it's so easy class, and everyone should get A very easily.	
15	I enjoyed the class and would recommend it to someone else.	
16	As long as you're willing to learn and do the work, you will succeed! Dr. Fu is great.	
17	An easy intro to nutrition and basic metabolism. Useful knowledge for health maintenance and a good foundation for future courses.

<b>Q11 - What are some things that your instructor has done especially well?</b>	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	87.50% (7 of 8)
1	She responded rapidly to my questions.
2	My instructor was not only fun, but informative, and took full advantage of the text book and other resources. Her online discussions expanded upon the topic that we learnt that week, so the material really stuck with me.
3	Kep great communication with me. Was very understanding of my situation and circumstances .
4	I really liked the way our teacher led the class. A great book to read and I found it very entertaining, fun and instructive. I really liked his methodology.
5	I appreciated the straight forward relaxed approach
6	Graded in a timely manner every week
7	Although this was an online course, my instructor made the class super fun! He has a great sense of humor, which many of us need in our lives. The work load is light and manageable, which I am sure many students appreciate considering most of us are taking more than one class at a time.

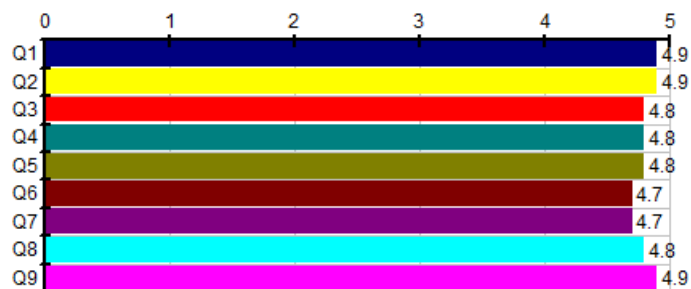

<b>Q12 - What suggestions do you have for the improvement of this course?</b>

3	None	
4	N/A	
5	I think it would be very good to keep this methodology.	
6	I don't know how one can improve on a perfect course.	

<b>Q13 - What would you tell another student who asked you about this course?</b>		
<b>Faculty:</b>	Zhuo Fu	
<b>Response Rate:</b>	62.50% (5 of 8)	
1	This is great class, lots to learn but not heavily stressful	
2	That this is the best online course I've ever taken! Nothing is off tangent, and always relates back to the lesson. In fact, the information you learn is helpful in the long run. I would also encourage other students to try her on-campus classes, because if she's this funny and engaging through text, then she must be even more amazing in person!	
3	It was a very interesting and fun class to take.	
4	I would recommend him 100%, not only for the way he leads the class, but also for his sense of humor, well-used examples at the appropriate times, and above all that he let us express what we thought and felt. I would recommend it to my colleagues.	
5	I would inform another student that the professor is excellent and makes the class super manageable. He is understanding and does whatever he can to help you succeed. This class is super interesting and easy to engage in, even in an online environment.

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	75.00% (15 of 20)
1	the structure of the class allowed me to make my own schedule for completing the weekly assignments. By allowing only one module per week to be viewed/completed prevents being overwhelmed with the amount of work required.
2	Used videos to help us understand the materials. Stayed available if we needed her.
3	She made the class interesting!!
4	Professor Fu does a great job at explaining exactly what she wants you to learn and where to look for it in the textbook. This saved me so much time searching for answers and reading pages that were not going to be on any tests.
5	My instructor has made sure that I became conscious about my weight and I became concerned about my nutritional health.
6	Keeps the course moving while taking a step back each chapter for a refresh, very informative!
7	I loved taking this class with Professor Fu, whenever I emailed her she made sure to get back to me super quick! I also thought that the modules were set up great with the questions, small overview quizzes, and a project some weeks! I think I have learned a lot and I am happy that I took this class with Professor Fu!

8	I love how she guided the students on how to make scholarly research.	
9	I like that she makes the questions clear and easy to understand and gives us at least a general idea of where in the textbook the answers can be found. I also like that she makes the class applicable to our lives by having us do things such as body weight studies based on our habits and calorie calculations for our food.	
10	I have enjoyed her creativity on discussion boards to help us know the materials.	
11	He was just amazing all the way around from teaching to the tests, the whole experience was great	
12	Grading in a timely manner	
13	Explained everything very well.	
14	Everything was explained well, she was helpful with all and any questions and made the class fun! I have not taken a college class that I thought was fun!	
15	Dr. Fu was a fantastic instructor! I took this class online, and she was so engaging, laid out our assignments so clearly, directed us to exactly what she felt was important to know, and graded us well. I loved that she would ask us lots of questions about how we felt the material related to our lives. She did practical experiments with us to help us understand how the things we eat affect our bodies/health/weight. Would highly recommend this course and Dr. Fu!	

#### Q12 - What suggestions do you have for the improvement of this course?

Faculty: Zhuo Fu		
Response Rate: 70.00% (14 of 20)		
1	n/a	
2	Provide feedback. If I get an answer wrong, I would like you to tell me WHY I got it wrong & maybe provide me with the correct answer.	
3	Nothing	
4	Nothing	
5	Nothing, I truly enjoyed this class and the way it is structured.	
6	None	
7	No improvements needed.	
8	Nil	
9	NONE!	
10	N/A	
11	I would say that the class is fine as it is.	
12	I think the class was wonderful	
13	I think it was a good course overall, but maybe to ensure that the answers will be marked correctly on the quizzes prior to students taking the quiz.	
14	I think he's doing great !	

#### Q13 - What would you tell another student who asked you about this course?

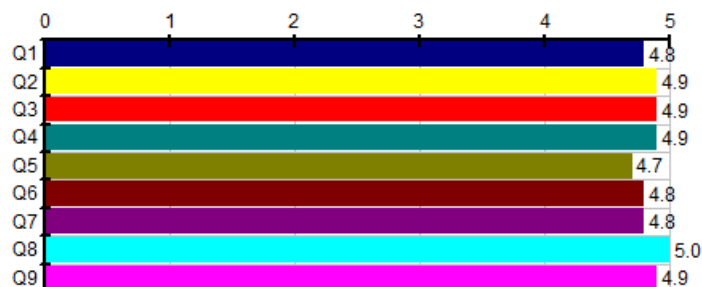

Faculty: Zhuo Fu		
Response Rate: 75.00% (15 of 20)		
1	You have to try really hard to not get an A in this class. However, don't let that mislead you. Each week you will have 3-4hrs of homework but, it is well worth it.	
2	This was a very easy class. And the assignments we're fun & simple. She does a good job highlighting the important stuff. Sometimes, typos made the questions a little more difficult, but that did not happen TOO often	
3	This course is very informative and is fun.	

4	That he was extremely nice and that it is not a difficult class. Super friendly environment. Truly enjoyable class.	
5	Take this class, the information, is helpful!	
6	She is the best.	
7	It was fantastic! You won't be sorry you picked this class!	
8	I would tell them to definitely take it this class is a class I feel like everyone should take and Professor Fu makes it enjoyable not stressful!	
9	I would tell them that this is a great and fun class, I wish I could have taken this class during the fall or spring with more students. But overall this is a great glass.	
10	I would tell them that it is a good class to take if they are interested in the topic.	
11	I would definitely tell another student to take this class for the sake of their nutritional health.	
12	I really enjoyed this class. Decent amount of work and text book is necessary for success in the course!	
13	I loved it, it was great to learn in a way that can be put to use in your day to day life.	
14	I highly recommend this class as a foundation for A&P. It provides an overview of important concepts needed for that class.	
15	Funny guy ! great sense of humor and very informative and fun with his projects.

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	80.95% (17 of 21)
1	she was very attentive and understanding. The class format was very fun and interactive.
2	explain assignments clearly, and enter grades on time. Made class fun and made it known that she was to approachable, which is not common, so thank you!
3	This instructor did a great job giving us information we could use in our everyday lives.
4	The instructor definitely did everything so well. I literally loved this class. It definitely was fun to learn.
5	The course has been very organized and the instructor is great at helping you understand the material.
6	The assignments are clear. The exams are not about a grade, but rather about learning. The amount of time to do the work was very fair.
7	The Professor always had something for us to do and the work load was not to hard

8	She responded to emails very quickly and has a great sense of humor which made me happy to be a part of the class.	
9	She interacted with us using discussions and projects that created nutritional awareness.	
10	She explained the courses work well.	
11	My wife and I were away on vacation when my computer broke. I let the instructor know that I would try to get the computer fixed while on vacation but that the assignment due that week might be submitted late. The instructor said I should enjoy my vacation and that she would hold the assignment open with with no penalty, and that I could take care of everything when I got back. I thought this was very fair and saved me the trouble of trying to get my computer fixed in a strange town.	
12	Makes it accessible for all students and is an easy course which is less stressful.	
13	Interacting positively with students	
14	I work a full time job outside of school so I was nervous about time management at the beginning of the semester. Instructor Zhou Fu had the semester organized in a way that worked not only for students taking other classes, but also students that work full time and have other commitments throughout the week. I felt that I had ample time to study and complete assignments while also juggling the rest of life. What a great class this was!	
15	He definitely made the course a fun one while also covering the material we needed to learn. You can tell that he wants his students to thrive in his class but at the same time making sure the lesson is learned. He as very helpful with any questions and comments.	
16	Dr. Fu was an excellent instructor to have this semester. She cared more about our understanding of the information more than just knowing the answer. I enjoyed my time in her class and learned a lot about myself and my habits.	
17	Being more concerned about us learning rather than being a stressful class.	

Q12 - What suggestions do you have for the improvement of this course?		
Faculty: Zhuo Fu		
Response Rate: 76.19% (16 of 21)		
1	n/a	
2	for the last couple assignments I wasn't able to download a question sheet but I copy and pasted it , then answered the questions on google docx so it is not a big deal. other then that no complaints.	
3	The questions from the book can be a little confusing sometimes.	
4	Really couldn't think of a better class to attend.	
5	None!	
6	No suggestions.. Dr. Fu is amazing!	
7	N/a it was very good!	
8	N/A	
9	It was perfect!	
10	I would like to do more activities. The labs or activities were very intriguing.	
11	I wish that there were some power point presentations or a way to make it less self-taught.	
12	I thought the syllabus was a mess for this course. The grid/line spacing for the calendar was skewed so it made it extremely difficult to know when work was due. Because the syllabus was a not presented in a straightforward manner, I was a full week ahead at one point and a full week behind at another, largely because the syllabus was confusing.	
13	I don't have any suggestions	
14	I don't have any suggestions	
15	I am not sure.	
16	Adding in lectures. I feel like I did not learn as much as I wanted to during this course because there was no lecture material-just questions about topics in nutrition each week	

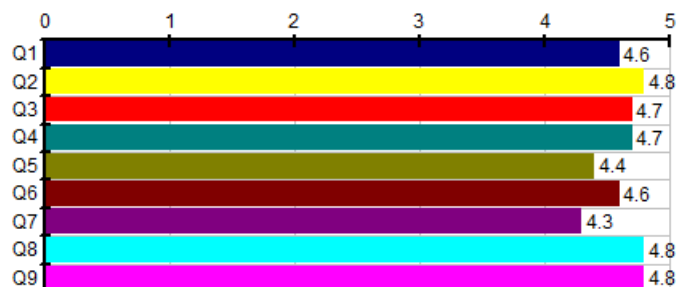

Q13 - What would you tell another student who asked you about this course?		

<b>Faculty:</b> Zhuo Fu	
<b>Response Rate:</b> 80.95% (17 of 21)	
1	To take this class because you learn a lot and the material is fun. The class is very engaging.
2	This was my best online class this semester, and I am extremely grateful.
3	This is a great course to learn the basics about nutrition.
4	This class is an excellent class to take to learn more about yourself and your habits. Dr. Fu is awesome and is always ready to assist you if needed.
5	That if they need to take a stress free class with their harder classes then this is the class to take
6	Take it!
7	Make sure you get Professor Zhuo Fu as a teacher! Very educational class and he's very interactive with his students although it's an online class.
8	Learned a lot for a class online.
9	It really gave me a lot of useful information.
10	It is super easy and my professor was amazing!!
11	It is fun and informative with a professor that is understanding and helpful
12	It is a great course, you will learn so much and get a lot out of taking this class. I would highly recommend!
13	I would tell them this was a great class and had a great instructor.
14	I would recommend a different nutrition course if this is the field that they are interested in
15	I would definitely recommend this course to another student. Excellent teacher! Wish I could have her again!
16	Have fun while learning important nutrition facts. The professor is fun and down to earth.
17	Dr Fu is an amazing instructor that will help you understand the material and enjoy learning and changing ideas on nutrition to better understand.

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	77.78% (14 of 18)
1	With every assignment, she pushed us to find the information on our own so we could actually learn, but never especially difficult either.
2	She makes the class more enjoyable by not pressuring us to memorize the material just for the test. Instead we can be more relaxed and actually enjoy learning about the class.
3	She listened to me whenever I needed help with certain questions
4	She has made learning enjoyable. She explained all concepts of what we were learning in the course very clearly. Her instructions were clear and very easy to understand.
5	She did a great job explaining topics of discussion.
6	She always has the assignemnts up and ready and she is also very flexible.
7	One thing Professor Fu did amazingly well, was she explained the purpose of this class really clearly. She didn't demand that we memorize everything, she wanted us to be exposed to the material so that we could find it when we needed it. I found her approach realistic and I really enjoyed her class. c:

8	Key learning points are great!	
9	It was really well prepared so that I could work at a consistent pace and always know what to expect.	
10	I loved every moment of this course. Thank you for keeping it real :)	
11	I enjoyed the assignments she created. It helped me understand the information fast and easy. I also believe the weekly discussions were created well.	
12	Grading gets done quick which I appreciate, Professor Fu also messages you before assignments are due as a reminder which is very nice!	
13	Creating easy but useful ways in order to better learn the material	
14	Clear expectations and quick grading of assignments.	

<b>Q12 - What suggestions do you have for the improvement of this course?</b>		
<b>Faculty:</b> Zhuo Fu		
<b>Response Rate:</b> 66.67% (12 of 18)		
1	nothing, I think it was a great class.	
2	When it comes to assignments, allow us to find the answers in the textbook, rather than giving us the exact place the answer was in. It would help us learn a lot better, if we had to figure it out on our own.	
3	None	
4	None	
5	None.	
6	None, my teacher did a great job.	
7	None, Loved it just like it is	
8	Maybe to incorporate group projects.	
9	I don't have any suggestions, I really enjoyed taking this class.	
10	I can't think of how to improve this course, it was straightforward and fun. Thank you!	
11	Honestly, not much. Sometimes it felt like there wasn't that much attention on the actual textbook, but at the same time the content was really well covered in a practical way.	
12	Although she clearly states it at the beginning of the semester, sometimes it is hard to understand her questions because of the wording.	

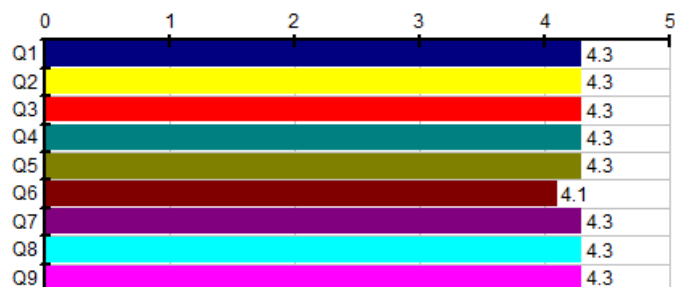

<b>Q13 - What would you tell another student who asked you about this course?</b>		
<b>Faculty:</b> Zhuo Fu		
<b>Response Rate:</b> 72.22% (13 of 18)		
1	This is an awesome class with a wonderful professor.	
2	This is a great course and you will learn a lot from her.	
3	This class is very informative and fun to take!	
4	The professor is hilarious and you really understand and learn a lot about the importance of nutrition for young children.	
5	That the professor was great, and really wanted to you to learn how to find the information that was important, and helped you push yourself to do it on your own. Which I truly appreciated; she gave us the material we needed so it wasn't like a crazy chase to find what we needed.	
6	Take this class with this instructor. No other.	

7	Take it! It's very informative, especially if you have little children, are pregnant, want to be a teacher or have a career that involves being close to children.	
8	Take it! It was fun and really helpful, I understand a lot more about child nutrition and their overall well-being now. I learned that the "W" position is not good for joint health and because of that I was able to help correct the way my youngest sibling sits. He sits much better now. c:	
9	Professor Fu is very fun, she is open to any opinions on the topic you are learning about and always has a no right answer kind of attitude.	
10	Professor Fu is amazing! She is a genuine person and makes the course easy going and fun to learn. Overall I would highly recommend her and the course to other students.	
11	I would tell another student that this course is very interesting. She/he would really enjoy taking this course. The material is fascinating and the course is laid out well. The professor gives clear instructions, so there is no question on whether you have done the assignment right or not. It is a great class overall.	
12	I would recommend this this professor to them.	
13	Definitely worth taking if you're good at being independent and working on your own. Super great pacing and easy to keep up with.

<b>Q11 - What are some things that your instructor has done especially well?</b>	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	57.14% (4 of 7)
1	Very positive outlook/attitude and it is obvious that she loves the course and its information.
2	She is down to earth and fun! When she has us do a discussion she provides an example for us, which provides a better understanding of what she wants and it lets us feel more comfortable considering she is so open about her personal experiences.
3	My instructor made the content easily understandable and applicable to my own life.
4	- Let students feel comfortable about discussion questions. No judgement about our responses. Made it clear that she wanted us to learn the information.

<b>Q12 - What suggestions do you have for the improvement of this course?</b>	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	42.86% (3 of 7)
1	None.

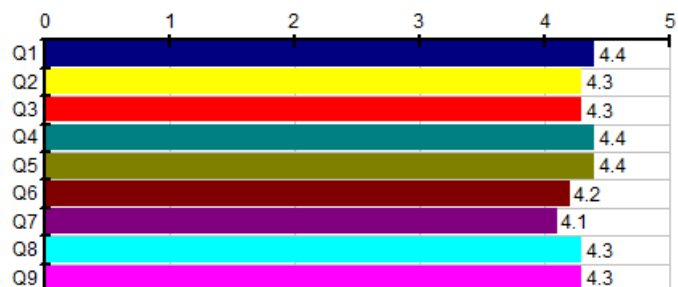

2	None, she did a fantastic job! Don't change a single thing.	
3	N/A	

Q13 - What would you tell another student who asked you about this course?		
Faculty:	Zhuo Fu	
Response Rate:	57.14% (4 of 7)	
1	You may have to write about some personal experiences and your weight (but she's super flexible, if you're not comfortable).	
2	It is very interesting and not too much work, but a reasonable amount.	
3	Absolutely take this course, it is a great time, paced well, the teacher is great, and you will learn alot.	
4	-Take this course! It is not hard. Just make sure to pace yourself with completing assignments on time. You will also gain knowledge of things you can use in your personal life.

<b>Q11 - What are some things that your instructor has done especially well?</b>	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	88.89% (8 of 9)
1	made the course fun
2	class was fun and educative.
3	Very explanatory and helpful! Loved this instructor
4	She was consistently prepared and the layout of the course was very organized.
5	Making sure we understand how to do the assignment by providing examples of the projects and assignments.
6	Loved this class!
7	I loved how she was supportive and did t out too much pressure to be perfect.

8	Her sense of humor and light hearted spirit really made the class fun as well as educational	
---	--	--

#### Q12 - What suggestions do you have for the improvement of this course?

Faculty: Zhuo Fu		
Response Rate: 55.56% (5 of 9)		
1	more diverse projects	
2	The course should have allowed modules to stay open for the week, instead of only 2-3 days. This is a summer course, and students should have been allowed to work ahead in the class.	
3	Nothing what so ever	
4	Just work on those language skills :)	
5	I don't really have any the course was well prepared and was very easy to do.	

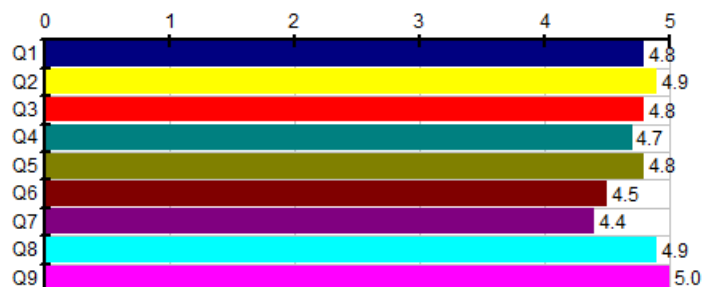

#### Q13 - What would you tell another student who asked you about this course?

Faculty: Zhuo Fu		
Response Rate: 66.67% (6 of 9)		
1	this professor is very funny and his class is great!	
2	definitely recommend	
3	The instructor was great and you learn a lot of important information in this class than you probably didn't know before	
4	Overall, the course was very organized and the teacher was very helpful and had a great sense of humor.	
5	Make you look at due dates. Some students are used to having all week to do some assignments but she does hers differently. So just make sure you heck the dates and how much is due when planning out school time.	
6	I'd say go for it, you won't regret it!

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	77.27% (17 of 22)
1	relates well to the health and nutrition to everyday life
2	making it very clear what we are supposed to do for assignments
3	This course was online but the instructor was very helpful giving us all the material needed to know for exams and make the discussions boards fun to share with the class.
4	This class was incredibly informative and enjoyable. We had a lot of notes and textbook readings but the discussion boards were really fun to write and chat about with other classmates. I also learned a lot about myself and my eating/exercising habits. I have never personally met the instructor but she makes learning really fun.
5	The work was consistent and communicated, I didn't feel like anything was sprung on me or mentioned too late to complete. I also enjoyed the projects, they were difficult to keep up with but they helped reinforce concepts in the course and ground them in daily life.
6	The instructor did explaining very well, grading, making it a way for everyone to learn and never overdid it, provided different ways to learn and test our knowledge.
7	The instructor provided a great communication space through her discussion board reviews that allowed students to feel heard as they expressed their ideas of the nutrition topic.

8	Really made the class very enjoyable and easy to understand what assignments were do and allowed for us to take 2 attempts to make sure we understood what we got wrong.	
9	My instructor has done a good job of explaining and providing information that everyone can understand. I also enjoy the learning videos that she provides, including examples of her own to help us better understand.	
10	Making this class simple and to the point	
11	Making students feel engaged, keeping things interesting, ensuring we're prepared for exams/quizzes.	
12	It was nice to have a week to complete assignments and multiple days to complete tests so that there was built in flexibility to fit assignments into each student's schedule.	
13	I like how the instructor posted everything to do with details at the beginning of the week with clear due dates	
14	I can't tell, probably everything :)	
15	Grading was very well done and understanding. I also liked that she gave us enough time for the assignments.	
16	Explaining stuff and letting us know where to find it in the book when we are doing homework.	
17	Explain, show, and have the students see how our own body works with certain nutrients that we consume and compare our body weight, energy and etc on what we may have consumed.	

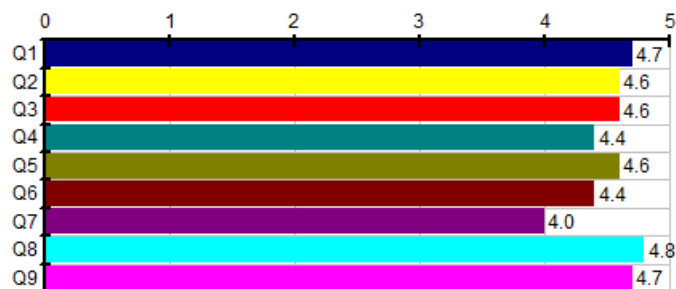

Q12 - What suggestions do you have for the improvement of this course?		
Faculty: Zhuo Fu		
Response Rate: 77.27% (17 of 22)		
1	none	
2	none really	
3	class is one of my favorites. Not stressful but I have learned a lot	
4	The course was well organized and well done.	
5	Nothing	
6	Nothing, I found everything great, helpful and beyond interesting!!	
7	Nothing really	
8	None	
9	None, loved it.	
10	None :)	
11	N/A	
12	JUst to fix some grammar nad fix some spelling but other than that it was great!	
13	I think the review quizzes helped me retain what I read a little more than any of the other methods, I wish they were included for some of the later weeks.	
14	I have no suggestions for this course. The instructor was amazing and she provided a lot of different ways to learn the material.	
15	I don't have any suggestions.	
16	I do not think monitoring our weights for a week was a helpful way to figure out how diet affects weight -- I think there are too many variables to consider and one week is not enough time to account for them all.	
17	I can not think of anything I would say this class was really very intersting.	

Q13 - What would you tell another student who asked you about this course?		
Faculty:	Zhuo Fu	
Response Rate:	77.27% (17 of 22)	
1	that they should take it and will learn a lot of our diets and health	
2	This course is fun, interesting, and informative. You retain a lot of what you learn and can apply it to your own health. It's definitely worth taking.	
3	The instructor is helpful at explaining complex things that you may not understand, and provides interesting discussion boards.	
4	The coursework is clear and easy to complete on time, a good class for those who need a health credit, even if you're not a science or nursing student.	
5	Take the course if you find the lightest bit of interest because honestly I have learned so much information that I can actually implement into my life unlike a lot of other courses.	
6	Take it, you'll learn a lot and have fun along the way.	
7	She is a wonderful professor	
8	If you don't fall behind on the work it is easy to do well and learn a lot in this course.	
9	I would tell them, they are funny, flexible, and know how to do their job.	
10	I would say that professor Zhuo Fu is very good and make the course fun helps you learn and understand you body very well.	
11	I would say I think this course should be listed under pre-requisites because it's so much information that's helpful and worth knowing of for the rest of our life. I would recommend this course to a lot of others based on our health and all the many questions other have pertaining to their body.	
12	I would encourage all students to take this because you will learn a lot of yourself and your body. The information that you learn from this course will forever be useful throughout the rest of your life.	
13	I highly recommended that they take this class I learn alot and enjoyed the class.	
14	Go ahead and take it! :)	
15	Get the right textbook.	
16	First I would tell them to take the course since it provides a great introduction to nutrition.	
17	Doesn't give too much work, helped open your eyes and develop a new sense of discovery when it comes to your body and health, put things to a test like experience based off of you, and it fits learning and provides more learning.

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	69.57% (16 of 23)
1	This instructor was very flexible of student's schedules outside of school. Super encouraging and engaging class to be in! I hope I can sign up for any other classes that she teaches in the future.
2	The professor made it easy to understand topics and helped to contextualize them by using the discussion boards and allowing us to relate class topics to our own lives in our discussions.
3	The professor prepares the lessons very well so we can understand the content very well.
4	The course was clear in what was expected and the work was fun to complete.
5	The assignments in this course was not overwhelming and lengthy. The due assignments were short and got straight to the point. This helps a lot especially for people who can not focus or do well with a bunch of materials being sent their way.
6	She was good at explaining things in our discussions and returned graded assignments fast.
7	She responded to any concerns or questions I had promptly. Everything was also graded in a timely matter.

8	She gave criticism that was very informative and helpful without being abrasive.	
9	She gave me great opportunities to think in depth besides the knowledge.	
10	Professor Fu is very straightforward and very thorough with everything, I truly appreciate all of her efforts put into teaching	
11	My Professor would never miss the date to start our assignments every week and they had clear instructions of what we have to do for that week.	
12	Made understanding material natural.	
13	Made assignments very clear and fair.	
14	I liked that she put the emphasis on learning and on being able to use our resources to find the information we needed rather than on memorizing a bunch of information.	
15	I appreciate the way the instructor designed the assignments/questions and added textbook information specific to the questions contained in the assignment. I appreciate that I could see the final grade (aware that it changes as assignments are completed) The instructor responded quickly to questions.	
16	I am typically not an open person, so discussions were not a strong suit for me. But the weekly discussions helped me to be more confident in stating my opinion and being to read others brought a new perspective into learning. Being able to discuss learning material rather than being tested constantly made it more relevant to myself.	

#### Q12 - What suggestions do you have for the improvement of this course?

Faculty: Zhuo Fu		
Response Rate: 60.87% (14 of 23)		
1	none	
2	The only difficulty I really had with this course is the language barrier. The professor does not always speak english clearly enough for us to understand what the question is and what answer she is looking for.	
3	Nothing	
4	None	
5	None	
6	None	
7	None	
8	Maybe more little quizzes just to make sure we get the information down.	
9	Informative, interacting, and easy going. I wouldn't change anything.	
10	I'm aware it's not really the focus of the class, but I was interested in the professor's eastern background and enjoyed the discussion topics where things like gua sha and acupuncture were brought up in the context of the course so I think more of that would be interesting.	
11	I don't have any suggestions for improvement because everything is really straightforward in this course.	
12	Her English level (grammar & typographic errors) were sometimes lower than at an Elementary school level. That was very stressful learning at a college. I didn't want to waste my time to think about that unnecessary thing when I study and learn the main subject and further.	
13	Can't think of anything	
14	Better clearly outlined expectations for assignments.	

#### Q13 - What would you tell another student who asked you about this course?

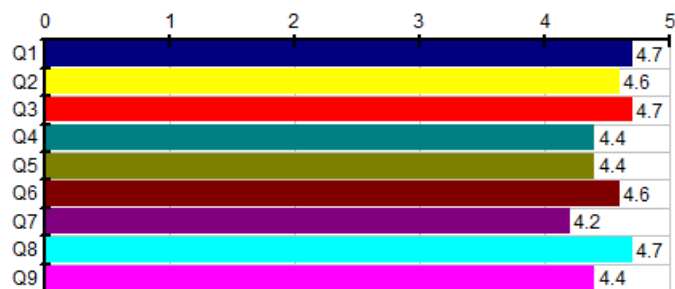

Faculty: Zhuo Fu		
Response Rate: 69.57% (16 of 23)		
1	To take the course because you can learn a lot and it's not a super difficult course.	
2	This professor is not only helpful but very knowledgeable. My wife and I had our first child on 4/11 and I have found that much of the information I've learned in this course is very useful and applicable to me.	

3	This is a class you will really benefit from if you are pursuing a career in Education.	
4	This course is very informative and the instructor focuses on what you need to know and helps you go straight to those specific topics.	
5	The professor doesn't speak perfect English to be patient and read things carefully to make sure you understand the questions because it may not be worded perfectly. The course is pretty easy if you read the textbook.	
6	The instructor was great. She has a good personality, fun and easy going. Makes class and the expectations a little less overwhelming. Believe me, when you first learn your professor is a neuroscientist can be intimidating and scary, but she is very down to earth and approachable. I enjoyed it!	
7	That it was a great course and the professor was very nice.	
8	She is an Excellent teacher, and I really love her how she is passionate about the subject. I highly recommend others to take her classes if they want to, but her English is awful sometimes, so be aware of that.	
9	Schedule out time to work on materials.	
10	Its a very by the book class and a lot of it is about children's safety	
11	It is a fun course that teaches you about child nutrition and the classwork is interesting to complete.	
12	I would tell them that everything is straightforward and the profesor is always on time for every week and puts grades in a good time.	
13	I would tell them to read more of the textbook to learn a little more and you learn a lot of cool stuff.	
14	I would tell them the information I provided in question 11.	
15	I would recommend other students to take this course. I've learned so much as an adult that I thought I already knew, but it expanded my knowledge!	
16	Great course

<b>Q11 - What are some things that your instructor has done especially well?</b>	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	66.67% (6 of 9)
1	The instructor gave plenty of time to finish projects and assignments. Made it very clear of what he expected us to do in the class and made the instructions for every assignment clear. When I would get a question wrong on an assignment he would tell me why so I understood why it was wrong.
2	The instructor was always open and available when issues arose.
3	The ability to submit things late.
4	Made the course easily digestible for a summer 10-week semester. Made projects simple but still educational.
5	Instructor has communicated well and give detailed instructions on assignments
6	I love that my professor has been able to come across as very personable which isn't that common when taking an online class. They have made the class entertaining and have kept me excited to dive into the new material every week.

<b>Q12 - What suggestions do you have for the improvement of this course?</b>
---

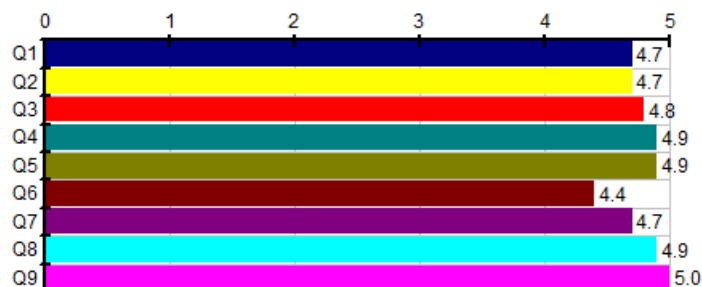

<b>Faculty:</b> Zhuo Fu	
<b>Response Rate:</b> 66.67% (6 of 9)	
1	n/a
2	To get detailed grading on the answer uploads so we know what we did wrong.
3	None
4	None.
5	Just some proofreading on assignments or posts.
6	I don't really have any suggestions to improve this course. I thought it was very well put together and the instructor did a great job.

<b>Q13 - What would you tell another student who asked you about this course?</b>	
<b>Faculty:</b> Zhuo Fu	
<b>Response Rate:</b> 66.67% (6 of 9)	
1	yes if interested in learning more about the back of the foods you or someone you know.
2	The course reinforces the reading. Very achievable course to learn and do well
3	That this is the instructor they need to have.
4	It was an educational and fun course that allows you to relate what you are learning to your own life.
5	It is a very informative course that I would suggest taking!
6	I would tell them to take their time with the assignments and don't rush through them. If they have questions don't be afraid to ask and don't do all the assignments in one day, spread them throughout the week.

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	100.00% (10 of 10)
1	easy to follow program
2	answered all emails in an appropriate amount of time, always gracious and understanding when a student was busy or could not complete assignments on time.
3	The uses of different assignment within the class. The projects were very interesting a provided a great way to fully understand cointent
4	Talked comfortable enough to relate but not cringe.
5	She's amazing and has made learning fun
6	She responds to her emails very quickly. She really narrow down the information that are important to learn for this course.
7	She does a great job at explaining and giving examples.

8	My instructor does a really good job explaining the assignments that I don't understand and she gives back really good feedback.	
9	Kept us entertained and working	
10	Grade assignments fast	

#### Q12 - What suggestions do you have for the improvement of this course?

Faculty: Zhuo Fu		
Response Rate: 90.00% (9 of 10)		
1	the question assignments are quite long sometimes, maybe break them up into two separate assignments so they don't seem as daunting.	
2	nothing!	
3	none	
4	dont ramp up the amount of questions during the end of the course	
5	The time between homework needs day more	
6	Nothing it's amazing	
7	I wish we can look more into why my weight changes so rapidly from one day to the next, but it is hard to do because it has many factors. I guess maybe doing the weight project over a longer period of time? It was interesting to see my weight changes for the project.	
8	I liked doing the projects and I think it would great to have more of more of them in the course.	
9	I do not have any suggestions for improvement of this course. She does a really good job preparing lessons. I never had any problems.	

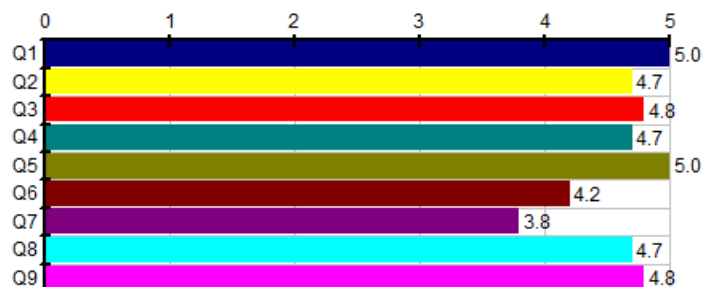

#### Q13 - What would you tell another student who asked you about this course?

Faculty:		Zhuo Fu
Response Rate:		100.00% (10 of 10)
1	this is a great course to take if you are interested in nutrition and health, you will learn a lot! just be prepared for a larger work load, professor is truly wonderful!	
2	easy A	
3	You will 100% be able to understand and do this class, but check homework daily.	
4	This teacher was awesome. I don't know if it all courses but for summer, we would have homework's due Wednesday & Saturday	
5	The information you learn in this class is valuable and fairly easy to understand.	
6	That you will learn as much as you want in this class you just need to do the work.	
7	I would recommend it	
8	I recommend Dr. Fu!! She is so funny and she is the best professor.	
9	Great course, would learn a lot of important information about nutrition. But it moves fast and it can be a lot of information all at once.	
10	Definitely take it. You learn so much and it proves that classes can be fun and teachers can be understanding

<b>Q11 - What are some things that your instructor has done especially well?</b>	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	83.33% (5 of 6)
1	What professor Zhou Fu did that was done well.... teaching how to research for information for a specific question. Also the discussion board she would ask open-end questions to create dialogue and from that learn from on another, i though that was very helpful.
2	The instructor has been very active in grading the assignments so that I can improve myself.
3	She grades everything in a reasonable time, she gives us her own opinion while still being open to ours.
4	Prepared every week matching up with a chapter in the book and graded assignments very quickly.

5	My instructor did well by:
	Stressing what she expected us to learn from the assignment, and making sure we knew where to find it
	Her expectation of us reading our classmates responses, which was very helpful in seeing other points of view, making it seem more like a virtual group discussion
	The way she related and shared her own experiences, which was very much 'normal' and 'relatable.'
	Letting us know that she understands that unexpected events may occur that may delay us in turning in our assignment and encouraging us to be forthcoming with letting her know - relieves a lot of stress
	I like that she made us feel from her introduction that the assignments would not be overwhelming, and that she is here to assist.
	She stressed that it's more important to know where to find the answers than trying to remember or memorize them
	Her comments in the syllabus - an instant relaxer!

Q12 - What suggestions do you have for the improvement of this course?	
Faculty:	Zhuo Fu
Response Rate:	100.00% (6 of 6)
1	The only thing I would work on is grammar
2	Release the modules a earlier so students have a chance to get ahead or just start on a Monday.
3	I'd like for the assignment questions to be in a document that I can edit instead of having to type them out in a google document to have the correct format.
4	I think there should be a few zoom sessions that would help in getting to know the teacher face to face and the students as well.
5	I have no suggestions for improvement. I have taken a lot of courses, and this one was made easier and less stressful by the method that my instructor used. The course was interesting, and very useful. I'm glad I was paired with Instructor Fu!
6	A suggestion I think a Zoom meeting with our class and professor that would be cool!!!

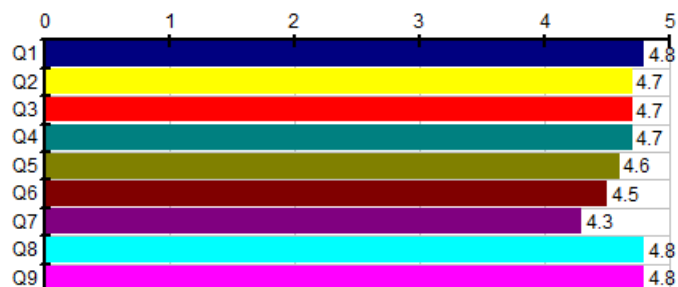

Q13 - What would you tell another student who asked you about this course?	
Faculty:	Zhuo Fu
Response Rate:	83.33% (5 of 6)
1	Take it! And I hope you get the class that Instructor Fu teaches!
2	It's pretty easy as long as you read the assignments carefully and turn everything in on time
3	I would tell another student that this course is highly recommended, this course provides you with how important it is to research information, the importance of knowing the information, and why its important to know and learn the correct information. Highly recommend! Thank You!!! I learned A lot!!!
4	I would definitely recommend it as it has been very informative for students pursuing career in early childhood education.
5	Even online, this course was amazing. I learned so much even when I thought I already knew a lot. I loved the book that was associated with this class. I liked the variety of videos, quizzes, questions, readings, and discussions.

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	86.96% (20 of 23)
1	very understanding of her students situation very forgiving and easy going very helpful
2	very helpful with the weekly questions, I learned a lot!
3	The projects that were assigned were a good way to engage and learn more about the topics we were discussing. I think the time allowed for the projects was reasonable as well.
4	The projects were highly engaging and informative. I also appreciated the textbook work she gave us as it made consuming information from the textbook easier.
5	The professor for this course assigned different assignments that kept the material interesting. She was able to relate most of the topics to real world situations which helped me learn the material better.
6	She was always very kind and wiling to help whenever anything arose. She was very thoughtful and thought us very good information to help us in our lives.

7	She made the class fun and presented the information in a entertaining way	
8	She made sure that there was clarification with assignments.	
9	Professor Fu gives examples of what is expected in the discussion assignments and quizzes and thoroughly explains everything really well.	
10	Prepare us with material for assignments in order to complete them each week.	
11	Posted and graded assignments in a timely manner and was always prepared, did a good job explaining the requirements of assignments.	
12	Outlining each lesson and creating assignments and projects that go well with each unit.	
13	N/A	
14	Keeping the course fun and allowed us to engage even though it was strictly online.	
15	I really enjoyed this class, she made it fun for her students.	
16	Giving adequate time to complete assignments	
17	Everything.	
18	Communicate. She helped explain and gave examples.	
19	As an adult single-parent student, my teacher was very supportive when unforeseen delays occurred. She was flexible and understanding any time I reached out to her. I appreciate her and the collaborative environment she created this semester.	
20	A great way of learning. He has a different way of teaching.	

Q12 - What suggestions do you have for the improvement of this course?		
Faculty: Zhuo Fu		
Response Rate: 73.91% (17 of 23)		
1	none	
2	none	
3	could have done much better.	
4	Professor Fu's pronunciation of words are hard to understand at times. I get that is how she talks and probably types how she talks and thinks. But, it hard to comprehend at times.	
5	Nothing, she was very helpful.	
6	None.	
7	None. Class is great as is	
8	None, I thought that everything went well and all of the assignments directly related to the textbook.	
9	No improvements needed	
10	N/A	
11	Maybe adding in another project towards the end of the course so students can see where their weight ended.	
12	I would love to see video lectures from her one day. She is an absolutely amazing person.	
13	I think the weekly assignments were unnecessarily long and some of the questions felt more like busy work than ways to engage with and learn the material.	

14	I think double-checking the spelling and grammar on assignments, canvas announcements, etc. I know the Professor is just now learning English so I am still very impressed with how well she is doing.	
15	I honestly don't have any.	
16	I have no suggestions	
17	I don't have any suggestions. I thought professor Fu's class was very well thought out, and it's clear that he spends a lot of time preparing the lessons and assignments.	

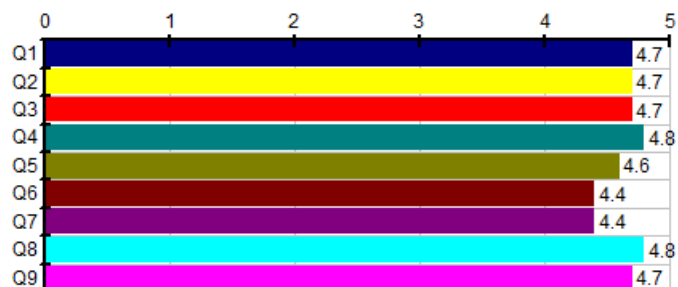

Q13 - What would you tell another student who asked you about this course?		
Faculty: Zhuo Fu		
Response Rate: 82.61% (19 of 23)		
1	this is a wonderful course, highly recommend.	
2	i would highly recommend	
3	You learn a lot about nutrition and you get to participate in cool discussions that require a good bit of thinking but that's what makes it fun.	
4	YOU WILL LOVE THIS CLASS	
5	Very interesting course, activities are very informational.	
6	To take the class	
7	This is a really fun class that I would recommend taking if you enjoy learning about healthy habits.	
8	This is a great class, especially if you're into or interested in nutrition.	
9	Take this course! It's worth your time, it's easy to understand and informative. Just don't slack off as I did. Textbook work is worth a lot of your grade.	
10	Take it with professor Fu!! Even though all the quizzes and exams are open book, I still learned a lot and it was really fun and interesting!! I enjoyed this class and really hope that you take it and enjoy it as much as I did.	
11	TAKE IT!	
12	It's worth taking and the instructor makes sure that everyone succeeds.	
13	I would say it is a great class to take if you need flexibility because of the online asynchronous way it is conducted. I enjoyed the projects and really appreciated that we had 6 days to get our assignments submitted. It gives time to do the work at your own pace but also allows someone who has a heavy work schedule to be able to get work done. The material covered was also interesting and helpful but sometimes there was some information that was a little bit too specific for a beginner nutrition course. Overall I enjoyed it.	
14	I would highly recommend this class and professor. I got a lot out of the class.	
15	I would definitely tell them to take this course if they are interested at all! I would tell them that it helps you learn more about food and your body, and how to properly nourish it. This course really shows you how eating healthier foods and getting regular exercise can help your body both now and in the future. Overall, I would recommend this course to any other student.	
16	I think we need this class for the benefits	
17	I feel like I can leave this class fully aware how my lifestyle impacts my health now and in the future. It was a very informative class	
18	I enjoyed it and reccomend taking it!	
19	Go for it! The class is very easy to follow, assignments are similar each week, and the professor is very understanding.

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	91.30% (21 of 23)
1	none
2	grading and returning assignments extremely fast
3	When I gave birth during the semester, I fell behind 2 weeks and allowed me to complete assignments with no penalty. Used humor in assignments!
4	The instructor focused more on us being able to find information rather than just memorizing a bunch of facts. I thought this was very realistic and helpful.
5	The instructor has graded assignments very well and in time and if a question was wrong the instructor explained why it was wrong and also explained the assignments and how to do them very well
6	The assignments
7	She has explained everything very well, and has made her assignments adaptive for every type of learner.

8	She has been so funny and made learning fun and not so intimidating.	
9	Relating the class material to our personal life and stories.	
10	Professor Fu has done especially well in making the course engaging, explaining concepts clearly, and providing helpful feedback on assignments. Her passion for child health and nutrition shines through, inspiring students learn.	
11	No comment	
12	Making all the homework clear so we could understand it.	
13	Letting the students understand the material through the questions she asked. At first, when a person sees all the assignments that they have to submit, it appears like it's going to be challenging but then once you get the pattern of how to do everything, the process becomes an ease. Als she is a very fun Instructor who just wants people to know how to be able to handle children emergencies.	
14	I think lessons are very clear and understanding and assignments are not overly hard and I've learned a lot more because of it.	
15	I really like how she doesn't just follow the textbook and lets you question it in discussion.	
16	I love that all of our exams are open note, and the questions to review the chapters are as well.	
17	I love how she doesn't make us stress out about mid and final exams	
18	I appreciated that Dr. Fu kept relevant and specific. She demonstrated a kind and empathetic method through her teaching that I have rarely seen. Her class was very enjoyable and I loved learning new things each week. She made HLT 135 super fun.	
19	Explain the course really well.	
20	Communication	
21	Being very helpful and understanding. That if I had any questions I would email her about them and she would respond to me quickly.	

**Q12 - What suggestions do you have for the improvement of this course?**

Faculty:		Zhuo Fu
Response Rate:		78.26% (18 of 23)
1	none	
2	none	
3	Some help to convey the ideas in English.	
4	Nothing!	
5	None	
6	None	
7	None.	
8	None, I found everything very well.	
9	None! I think she is a great instructor	
10	None at all.	
11	No comment	
12	N/A	
13	N/A	

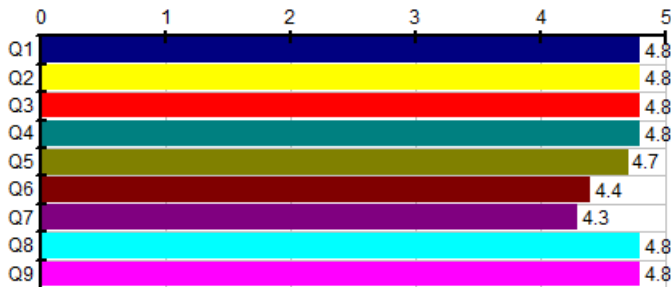

14	Maybe a little bit more structure or feedback, but overall I enjoyed how the course was done.	
15	I wish the homework more clear	
16	I don't really have any the class was very good and extremely helpful	
17	I do not have any suggestions for this course.	
18	Everything was good.	

<b>Q13 - What would you tell another student who asked you about this course?</b>		
<b>Faculty:</b>	Zhuo Fu	
<b>Response Rate:</b>	91.30% (21 of 23)	
1	that this course was amazing and my favorite professor so far.	
2	it's so hard to finish it .	
3	Use the textbook when you do the answers to the questions it will make your life so much easier.	
4	This is a good course to take and the professor was great.	
5	The teacher truly cares about the subject and is passionate about what she is teaching	
6	That it is a great course, I have learned so many new and interesting things this semester from this class.	
7	That I have had so much fun learning about health. Also, how the teacher is amazing and very helpful.	
8	Take the class.	
9	Take it!	
10	Reply to the discussion work in time and you can get a great word! She just wants to assure that the class is doing the coursework in time and is engaging with everything.	
11	No comment	
12	Ms. Fao was one of the best professors I have had!	
13	It's fun!	
14	It's necessary	
15	It was a fairly easy course to take.	
16	It gives the opportunity to disent and think about what is taken as good or recommendable in the area of health.	
17	I would tell them to take this course and it taught me a lot about health and nutrition and the instructor will help you if you have any questions	
18	I would say it's my easiest and most favorite class, I've learned so much	
19	I would recommend this class to anyone who is looking to go into childcare or who is looking to become a parent. I found this to be a very knowledgeable course and it wasn't stressful which was really nice	
20	I would HIGHLY recommend them to take this course with Professor Fu.	
21	I loved it. It was fun and I retained a lot of good info needed for my profession.

Q11 - What are some things that your instructor has done especially well?	
<b>Faculty:</b>	Zhuo Fu
<b>Response Rate:</b>	94.44% (17 of 18)
1	You have done a great job teaching me a lot about nutrition that I have never really thought about!
2	This online course was organized and easy to follow. Professor Fu was very clear about assignment deadlines, and grading was timely.
3	The professor is kind and very funny. She made the class enjoyable. I loved that her discussions were mostly asking the class our opinions on what we just learned. The class is focused on helping us to improve our health and understand our bodies better which I appreciated. All her projects were interesting and I learned a lot about my body and diet
4	The instructor prepared us for quizzes and tests well.
5	The instructor did a fantastic job making me feel comfortable sharing my own body and nutrition experiences and habits for discussions and projects
6	The instructor is ready to answer questions and has the course load posted in a timely manner. Things are due around the same time and are very consistent with the textbook, so nothing unexpectedly arises for time constraints.
7	She prepared everything for this course just right. I was able to really learn from the material provided.

8	She graded very quickly! She also was willing to extend the due date if needed.	
9	Provide us with everything we needed, and explained what we needed to do clearly.	
10	Professor Fu did an exceptionally well job with simplifying what we are learning so that we understand the material better. She doesn't overwork her students and is very lenient. Additionally, she makes the material interesting and fun to learn.	
11	I think the homework assignments were through.	
12	I think her explaining the assignments in detail really helped me out instead of just telling us to do them and submit with zero explanation.	
13	Grading all the assignment very fast.	
14	Detailed explanation on material we were learning about	
15	Being friendly and making the class fun	
16	Always prepared and always wanting you to do your best.	
17	-Keeping the course interesting and a good pace	

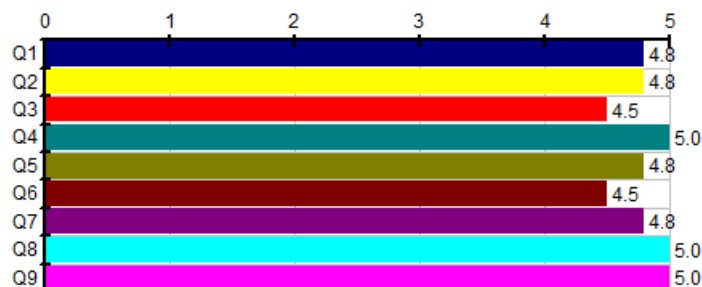

Q12 - What suggestions do you have for the improvement of this course?		
Faculty: Zhuo Fu		
Response Rate: 94.44% (17 of 18)		
1	less of a grade deduction for late assignments, maybe a brief week overview posted each monday	
2	The projects we were required to do in this class, specifically project 2, seemed inappropriate. Students should not be asked to intentionally gain or lose weight for an assignment, that alters their health. Asking students to weigh themselves weekly may also be triggering for others. There were also spelling mistakes in assignments and some unprofessional phrasing.	
3	Some of the questions on homework and discussions were worded a little off, making it difficult to understand, it would be helpful to have more concise wording on those things	
4	Nothing	
5	Nothing, it was a 10/10 class!	
6	None, she did extremely well.	
7	None!	
8	None :)	
9	N/A	
10	More videos	
11	Just keep doing what you continue to do and know you do such an amazing job at it!	
12	I would just say an improvement would be to double check what she sends out in regards to grammar. However, she clearly explained to her students that her English wasn't perfect so it really didn't bother me.	
13	I think she lays out the course material well and explains everything in detail. No suggestions	
14	I suggest asking a friend or another professor to read over her assignments for spelling errors.	
15	I have no specific recommendations for improvement; Dr. Fu is amazing!	
16	Honestly I think she changed this course for the better and there doesn't need to be any changes.	
17	-nothing she was great	

Q13 - What would you tell another student who asked you about this course?		
Faculty: Zhuo Fu		
Response Rate: 94.44% (17 of 18)		
1	This is not a hard course, but make sure you stay on top of the project due date schedules	
2	<p>This course is very easy going and as long as you do the work and turn it in on time, you will pass with flying colors! I love taking this course and I hope others will love it as much as I do!</p> <p>Thank you so much for you taking the time to teach me Dr. Fu! :)</p>	
3	This class can be very intresting and teaches you important things about our health	
4	They should take this course	
5	The class is very enjoyable. The professor is amazing and very funny. I loved the class a lot and I highly recommend it to other students.	
6	Take this class! I learned so much and it was an easy class to achieve an A grade.	
7	Its easy and interesting	
8	It's interesting if you like nutrition and the professor is funny	
9	It's fine, you'll get out of it what you put into it. The assignments are not overly time consuming.	
10	I would say that this is a great class to take with professor Fu. She makes the class fun, entertaining, and educational. I loved taking this health class for her and would really enjoy taking another one.	
11	I recommend taking this course. It broaden my knowledge of health and nutrition!	
12	I really hope you enjoy this class. It was honestly kinda fun and the instructor is great.	
13	I highly recommend this course with Professor Fu	
14	I enjoyed working with this professor and would recommend this course to anyone interested in nutrition and the health of their own body.	
15	I encourage other students to take this course, as Professor Fu is a delight! She makes learning fun, is very clear about assignment deadlines, and provides all the necessary information to succeed.	
16	As long as you turn the assignments in on time and read the material, Ms. Fu will have you on the right path.	
17	-Extremely recommended, as long as you do the work she will make sure you understand.
